Lara Stein, Myna Mukherjee,
Raghava KK, Shilo Shiv Suleman,*

launch

A Decentralized Autonomous Organization (D.A.O.)

A Decentralized Autonomous Organization (D.A.O.)

C³ *Is an ecosystem and stable coin **tied to carbon credits** to create and inspire greener futures*

→ **1 Carbon Credit** = a digital certificate that proves that a company or an environmental project (forest conservation projects, reforestation of devastated areas, clean energy, biomass, etc.) prevented the emission (pollution) of 1 ton of CO₂ eq (carbon dioxide) in a given year.

World's leading Artists, Scientists, Storytellers,
Engineers, Technologists, Philosophers and other
futurists come together to launch C3

Traded on OpenSea

1 C3 = 1 Carbon Credit = x\$\$

Creator centric projects

C³ An ecosystem and stable coin to create
and inspire greener futures

Through world class storytelling

As prescribed by Paul Hawken

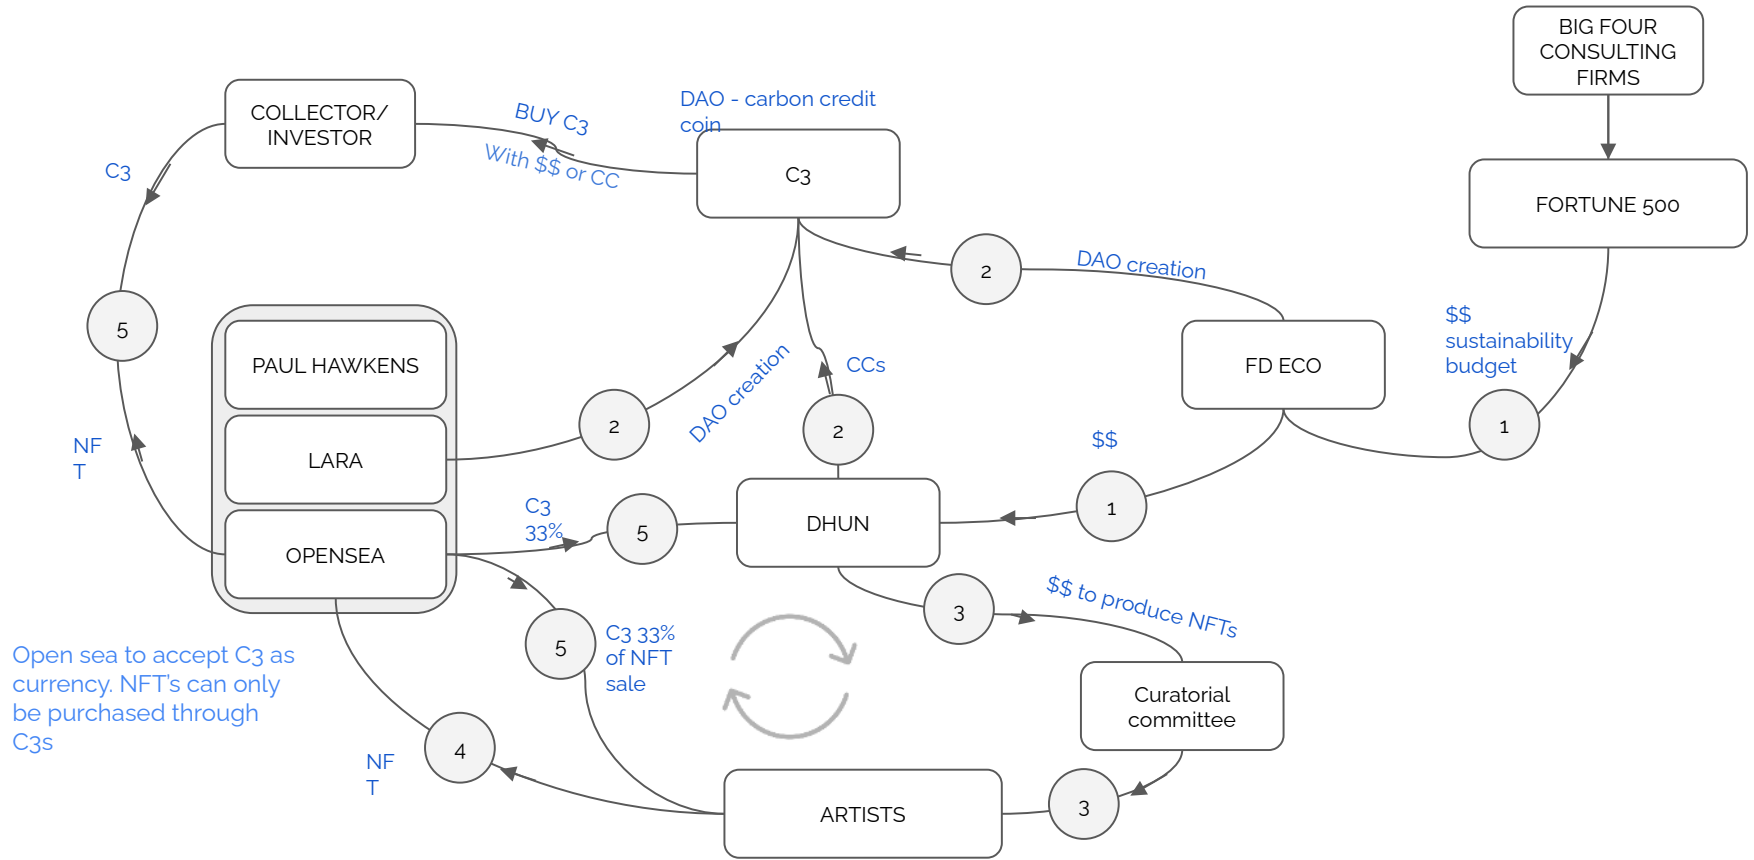

Key stakeholders

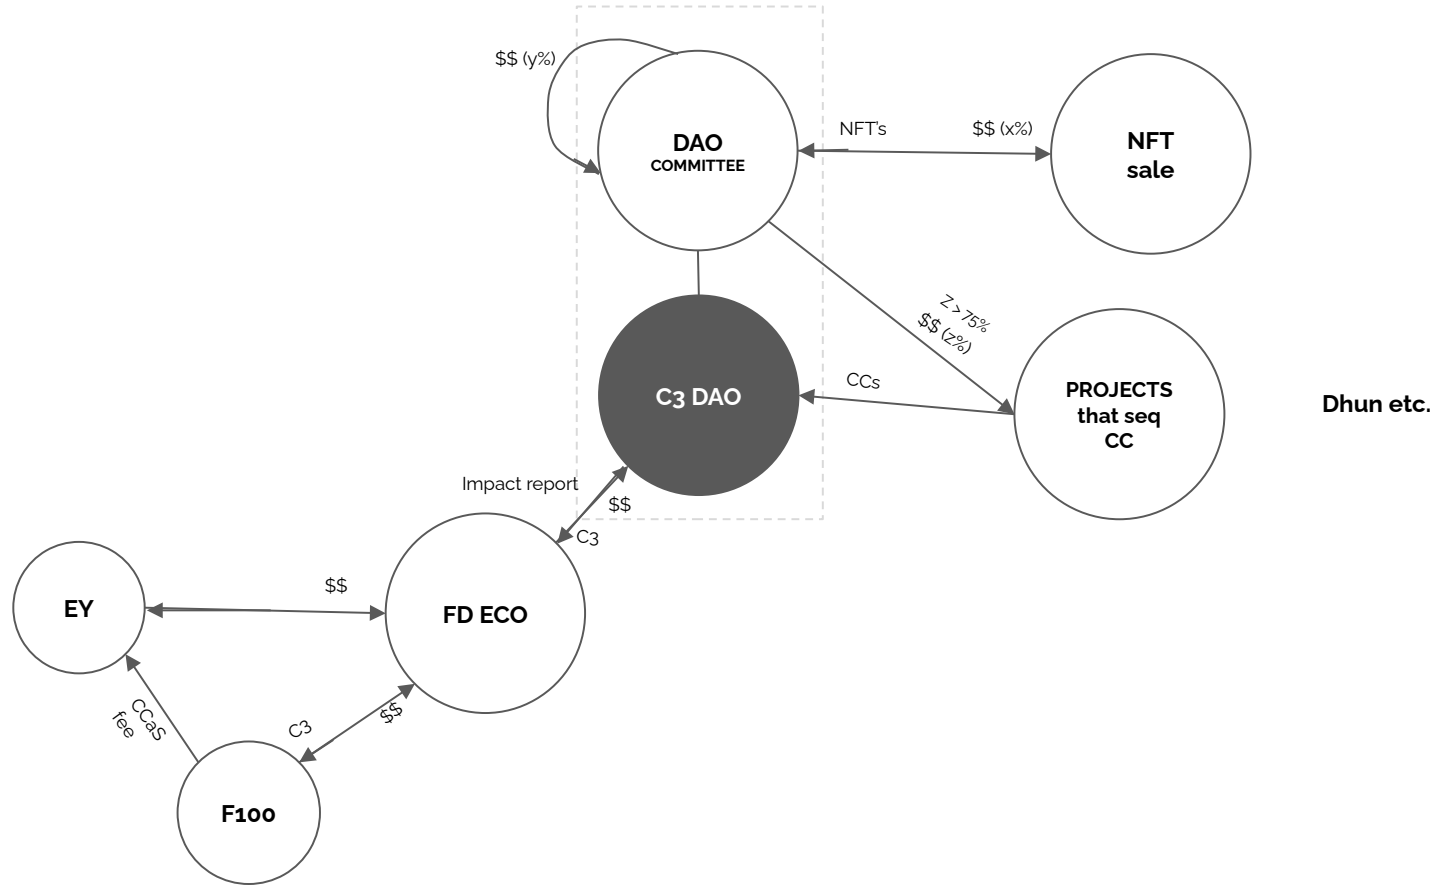

1. **Dhun**- Carbon credit supply, Inspirational project and Artists collective
2. **Freight Deck** - DAO creation, Demand side for c3, impact report, Eco_Land_Art OS
3. **Open Sea** - Platform - accepting c3 and seed sponsor (~250K)
4. **Lara Stein** - Producer of the whole project, sales and marketing
5. **Paul Hawkens** - Advisor and inspiration
6. **Artists Collective** - curated by Myna Mukherjee - Raghava, Shilo ++
7. **Ernst & Young** - validation and sales agent
8. **Collector/Investor** - holds value in the project

What and How?

15,22, 24, 30, (21)

- FD Labs + Dhun + OS + Lara launch a stable coin called C3
- C3 is always equal to 1 Carbon credit
- FD will facilitate (for a small transaction fee) the purchase of C3's from Dhun at market value
- Dhun will use the process to
 1. Grow asset/property (~80%)
 2. Enable co benefits - (20%) including art/ community/ research/ education etc.
- Artists and curators etc who participate in the first launch get founder coin allocations
- Holders of C3 may keep their asset in crypto or trade it/ stake it.
- Artists will use this funding to create a series of NFT's for The Launch of the Dhunn Project on Opensea.
- NFT's can only be purchased using C3 will will be available for purchase via \$\$ or CC's via FD Eco and Coinbase etc.
- Upon sale of the NFT - automatic split (smart contract initiates)
 - Artists (30%) , Dhun (30%), Curator (10%), Lara (30%)
- Dhun splits its income as always (80% grow asset; 20% artist collective)

why?

The initial network features the following:

- **A one-way treasury:** money goes in, and is directed immediately to carbon projects.
- **The bonding contract:** through which reserves of CC tokens are increased.
- **The staking contract:** where C3 rewards are distributed.

Token specifications

Number of tokens

Price per token

Initial Token Allocation

Token can be purchased on

Next steps

1. **Share vision with all stakeholders** - Keerthan+ RKK to write white paper with Lara, Dhun and OpenSea.
 - a. Everyone **shares feedback by a set date - in or out**
 - b. Hand over to EY - to study and package
 - c. **EY to execute project** end to end
 - i. White paper creation
 - ii. Packaging C3
 - iii. Selling C3
2. Myna to **create vision and mission for the collective** -
3. **Dhun to be ready to sequester CCs** - with Keerthan's help
4. **Lara to get OpenSea to agree to:**
 - a. See our presentation - agree upon a final version
 - b. Accept C3's on Open Sea
 - c. Initial funding - \$250K
 - d. Advice on white paper; marketing and sales
 - e. Offer global PR support
 - f. Feature on OpenSea
5. **All legal paperwork in place**
6. **Artists and artworks creation**
7. **Documentation**
8. **Marketing materials and story - website etc.**
9. **Launch strategy**

Timeline

The initial network features the following:

A one-way treasury: money goes in, and is directed immediately to carbon projects.

The bonding contract: through which reserves of CC tokens are increased.

The staking contract: where C3 rewards are distributed.

Freight Deck Inc.
The Supply Chain OS

Creating a collaborative smart OS for logistics with expertise in Unstructured markets

- Unstructured markets > Emerging markets
Latin America(\$650Bn), Africa (Egypt -
\$50Bn)
- Proven track record of over delivering SLA
targets to India's F100
- We facilitate seamless collaborations between
100s of players throughout the Procure to Pay
Cycle

WHY?

“What AWS did to cloud,
FD does to supply chain”

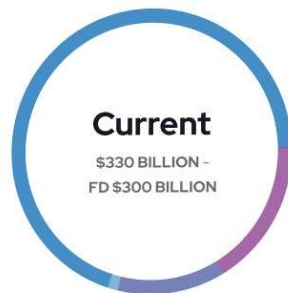

WHY?

"We believe that Logistics is the biggest need and opportunity of our times"

India Logistics market size (TAM)

Predicted: **\$210 Billion in 2020**

- Road transport 71%
- Rail 17%
- Water 10%
- Air and Pipeline 1.5%

Logistics market - **\$330 billion in 2022 @ 7%**

Total cargo move - **5.6 billion tonnes**

Tonne per km - **3 trillion tonne km**

WHAT WE OFFER?

Freight deck helps leading organisations in transforming their freight operations to improve their contribution margins

Costs Cut - **12%**

Throughput Increased - **20%**

Human effort reduced - **80%**

**Improved
Contribution
Margins**

Extradraising

Increased service levels

Reduced Costs

Improved
utilisation

Lower
Insurance

Higher Compliance

Improved Predictability

Increased productivity

End-to-end visibility

Lower TAT

Better Price Discovery
