Hero DNA

We carefully study the applicant's past

Passionate about the problem

Willing to go against the grain

Have proven themselves

Built skillsets on their own

Has a solid vision

Aligned to our (Fellowship + RG) vision.

We look for:

Mindset over skillset

Ask 'what if', 'why not' & 'how might we' questions
Question why things are the way they are.

Experimental, cutting-edge, agile. modular, fluid.

Focus on breadth in multiple areas v/s depth in a single field

Welcome new thoughts, perspectives and ideas

Trust, inclusivity, openness and holding space for expression as their fuel.

Purpose and transcendence is their guiding light; Reimagining rationalisation not just concepts and theories, but with feelings and intuitions

The Confidant

Internal personal mentor

Every hero needs a coach, someone who is on their side, someone they can trust and there's a bond of mutual affection.

Every fellow will be matched with a Confidant (mentor). It's someone our fellows can be vulnerable with and help them navigate the inevitable bumpy ride ahead.

This confiant is like a mirror, that not only shows the fellow what they have but also what they're missing and can bring in different perspectives.

The Arsenal

The Kickoff - Crossing the threshold

Kickoff:

A 6 day trip designed to expose fellows to moments and insights they've never had before, work with the local community, give and receive wisdom and bond with each other by doing something meaningful.

SPOC - Journey Coordinator:

He will organize the Kickoff Journey and curate the activities and the sessions.

The Arsenal

Masterclasses

The Master Classes: 3 in-person, 3 online classes from experts in the field.

Class: 1 day

Introspection + Outrospection (Empathy + Perspectives)

Behavioral Design

Thinking in Systems

Creating Effective Teams + Collective Action

Transmedia Storytelling + Experiential Futures

Make-o-nomics (DIY Maker Culture + Rapid Prototyping)

Practicum: 2 days fellows apply their learnings into the mega challenge. RGP holds the IP. The topic could be chosen on the areas RGP is researching on and believe have high potential for impact.

Example: Build a wellness toolkit, build a holistic assessment index, design a popup wellness lounge for India

Stitch & Build Ecosystem

Events to promote the fellowship + Become the thought leaders in the well-being space.

Wellness crawls: A city-wide event, where people explore spaces where well-being is nourished, exhibiting people, organizations, collectives and spaces.

Salons: A monthly fireside chat with people over some drinks/food talking about one of the well-being elements.

DIY Nights: People share their wellness hacks. Something anyone can do or use simple household items to do it.

Events calendar- Fellow event calendar to follow up

Checkpoint- Fellow meets to gather where they're at

Social media Group- Using WhatsApp, Facebook, LinkedIn appropriately

The Arsenal

Grants

For each fellowship cycle.

Individual Grants:

Each fellow is eligible to receive up grants for the the individual project they bring in. A pool of One Crore INR is available for grants (Avg of 10 L per fellow). To receive the grants, each fellow has to submit a detailed proposal of their project and what the grants will help them achieve.

Group Grants :

If 5 or more fellows want to work on the mega challenge beyond the episode, they can submit a proposal and receive a group grant of 25L INR and equity in the idea.

Appendix

Evolution

Year 1 and 2: India

Year 3: Expand in other emerging economies as a parallel fellowship led and managed by a regional ambassador. This will be contingent on securing external funding.

A strategic partner will fund the fellowship program and create an enabling environment for solutions to be piloted.

They may propose wellness related innovation ideas for the MasterClass MVPs and have a first right of refusal on the wellness-related innovation developed. (Initial Thoughts, will explore further with Atin)

SPOC (2018 Onwards) : Regional Ambassadors

Lead the expansion efforts. They will manage the fellowship in their respective regions with support from RoundGlass HQ

Expansion:

Why Expansion: Cross-pollination of insights, access to local talents, increase the rapidity of our impact, and bringing India to the world.

Destination Criteria : Close proximity with India and a close relationship with India. Large youth population with a clear need for wellness.

UAE:

Recently appointed a Minister of Happiness and wellbeing is high on their agenda. There is a significant Indian and youth population in the Middle East and a fellowship like this will be well-received in the volatile region.

Concerns/ Assumptions to be tested

Would the outcomes of the fellowship align with the vision and justify the cost?

- Are we getting the right impact for the investment?

Would this appeal to the fellows we want to attract?

Would it be feasible/acceptable for the fellows to engage to the capacity we expect?

Our Elements

Why periodic table

Approaching Change in any dimension, is to disrupt the fundamentals.

The periodic table is symbolic of our target - hack the fundamentals of the chemistry of wellbeing.

Like all matter is made up of elements of distinct characteristics, so is wellness. Revisiting fundamentals of what they are, how they combine and interact and their consequences might ultimately reform how wellness is perceived.

Create a framework to answer “Who am I?” so that one can define and redefine/reinvent themselves in an ever changing world/ The Creative Age.
