the ultimate OTHER!

- 1) when we fight the world alone we stand to loose.
- 2) when we fight as a couple we stand a better chance, when we fight as a family it increases and when this self grows it follows this

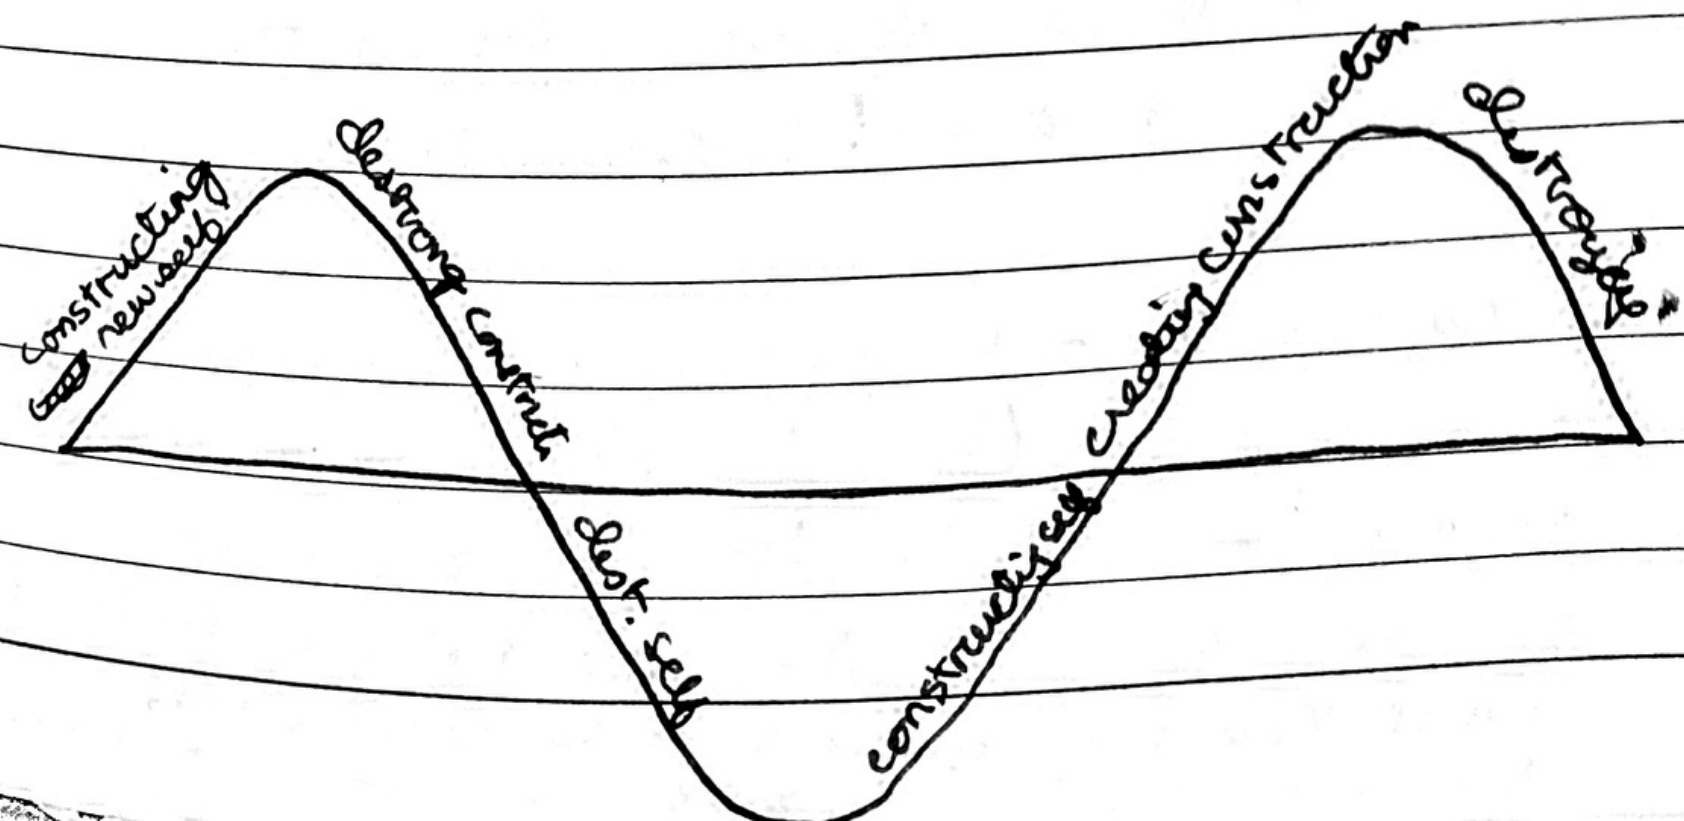

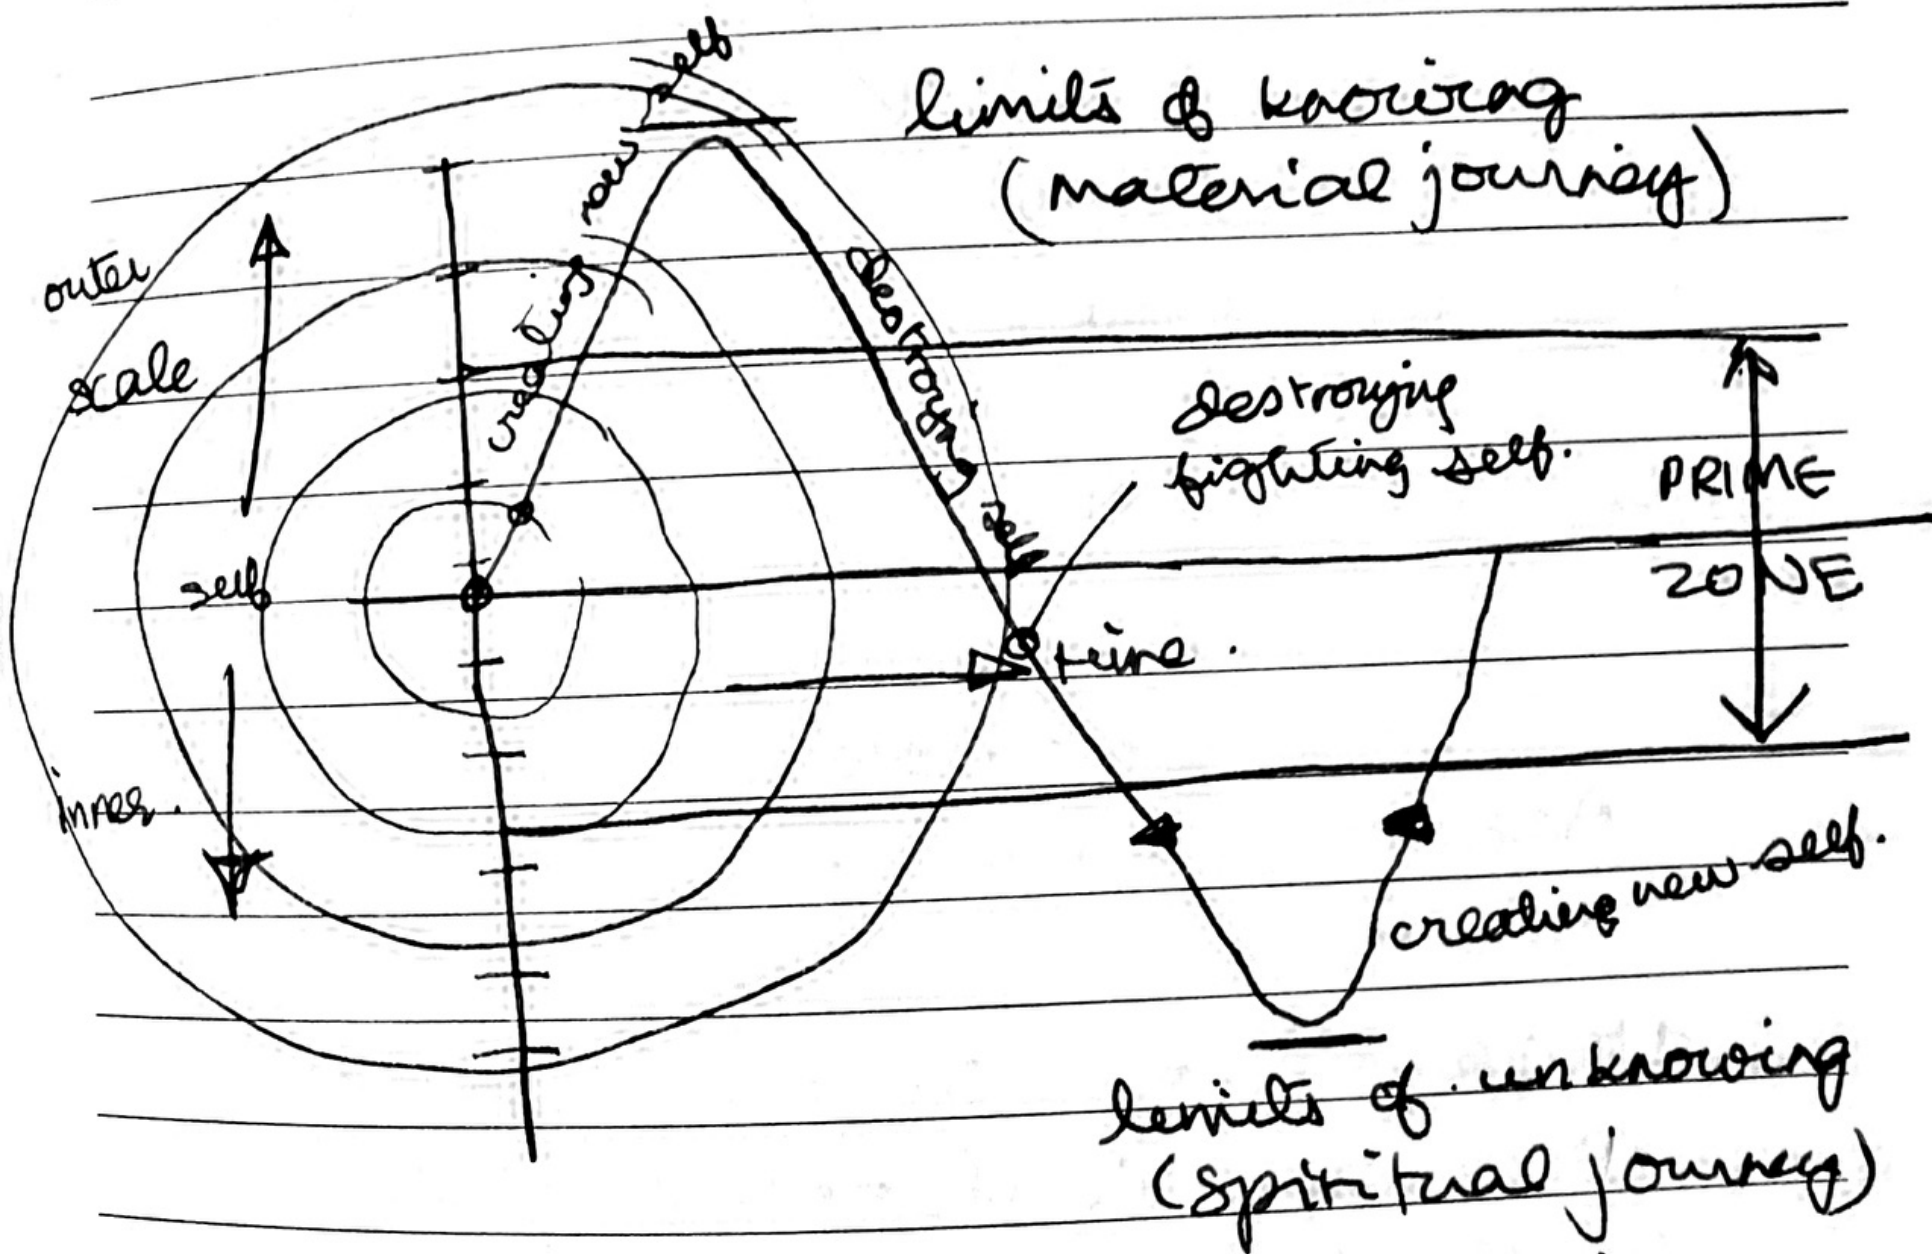

i) Humanity + Nature + Space Vs ?
 the search beyond space ends in a blackhole.
 No one knows what contains space.

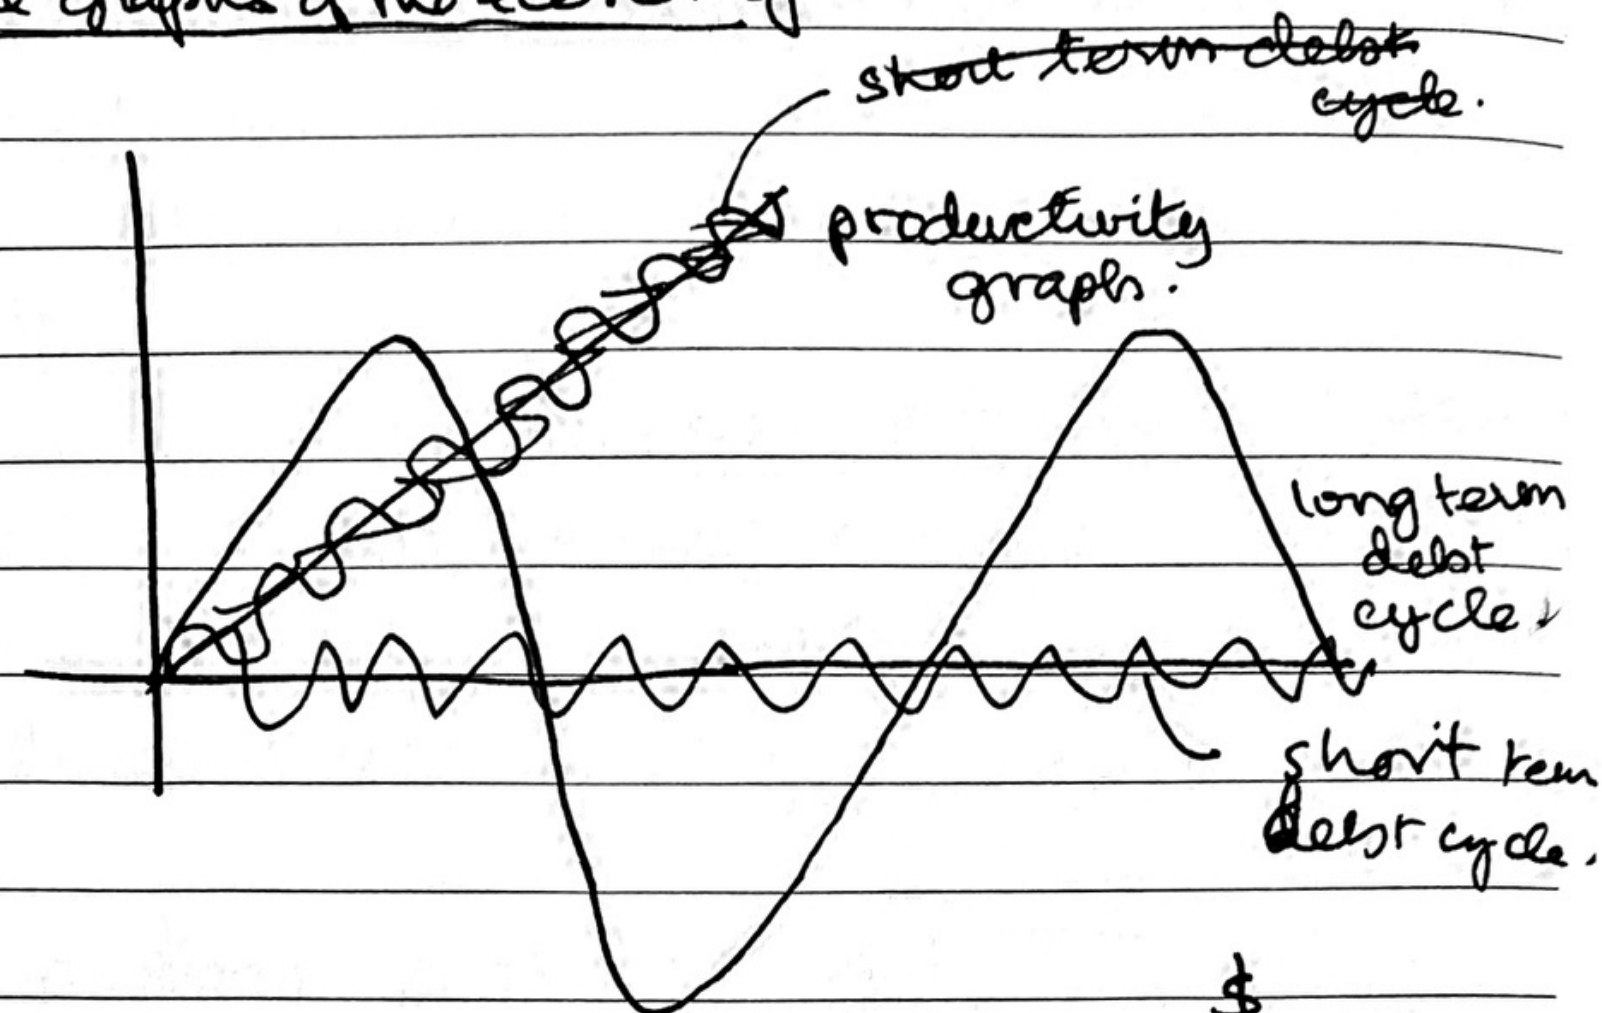

lets take the next leapage.

Humanity + Nature + God Vs. ?

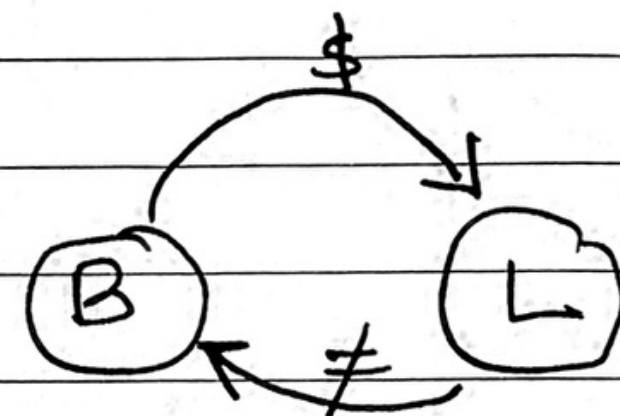

We do not go far enough to ask who created God? again we hit a dead end.

three graphs of the economy.

Short term debt cycle =

~~But~~ B gives \$

L can not return \$

B runs out. stops cycle.

Adjustments made:

I think that there is a parallel between our construction/deconstruction process and the three economic cycles. → curious to find out more! (lets see!)

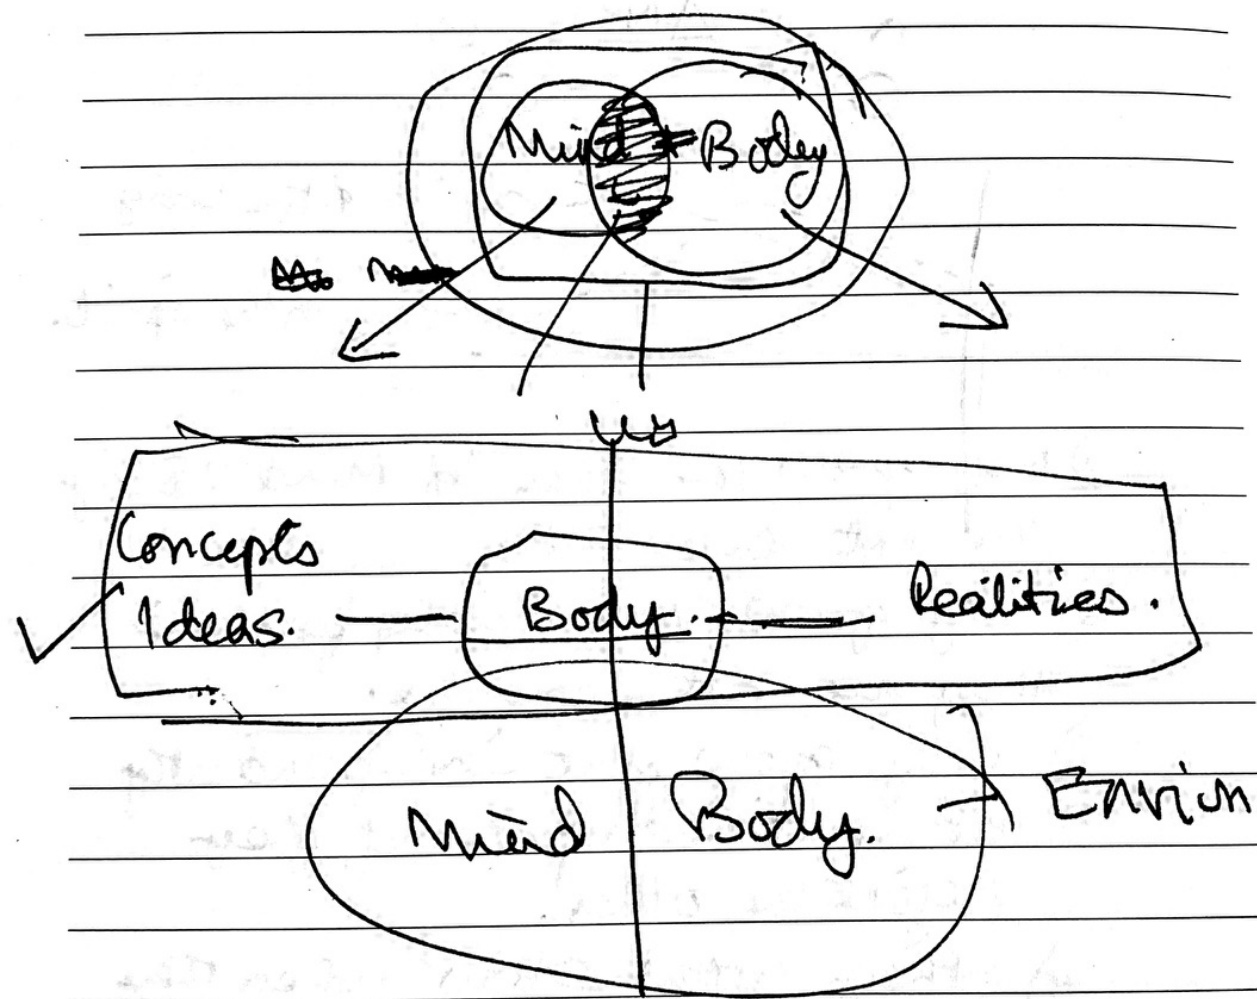

Another thought - when the film world has acomodated (making of) documentaries as films - why hasn't the process as art become as mainstream? I think the truth is that they both are scared to reveal their tricks - real truths → It may loose value then,

what if I can apply the small pattern of how I created a new style for myself to my life - (assuming life is like a practice). I'm not looking for perfect metaphors - but for ~~better~~ newer metaphors. No newness without new language?

The objective of such an enquiry would be to create new metaphors and develop them. I believe this is no different from what we are doing with the economy.

The conflict between Body/Spirit
between Matter/Form (essence)

Notes from pragmatism:

Lecture 6.

Charles Maxwell.

"Yes, but I want you to
tell me the particular go of it"

Philosophers: Schiller, Dürer

Classic Stages of a Theorist's career:

- 1) A new theory attack as absurd.
- 2) (taken to be true) $\Rightarrow$ obvious and insignificant
- 3) So important that $\hookrightarrow$ adversaries claim it was their idea.

Dictionary: Truth $\rightarrow$ a property of our ideas
(true) / agreement / disagreement (false)
Relativity $\rightarrow$? precise meaning?
 $\rightarrow$?

A true idea must copy its reality.

Shut your eyes $\rightarrow$ clock
when our eyes can not copy ~~exactly~~ definitely
their subject. What does agreement mean?

- ① It is true as long as ~~God~~ its what
God thinks they ought to think about
that object. (proposition)
- ② ~~copy~~ Truth $\rightarrow$ to the level of copy.
to their external
way of think.

* Truth $\neq$ intent or static relation
* If this ~~X~~ is believed to be true,
what concrete difference will its being
true make in anyone's actual life?

How will the truth be realized?

What experiences would be

obtained if the former was false?

What in short is the truth's cash value?

$\downarrow$
experiential terms

Assimilate
Validate
liberate
beatify. } Truth's value

False ideas can not

Truth is not a static property inherent
in a thing - Truth is what happens to it
It becomes true

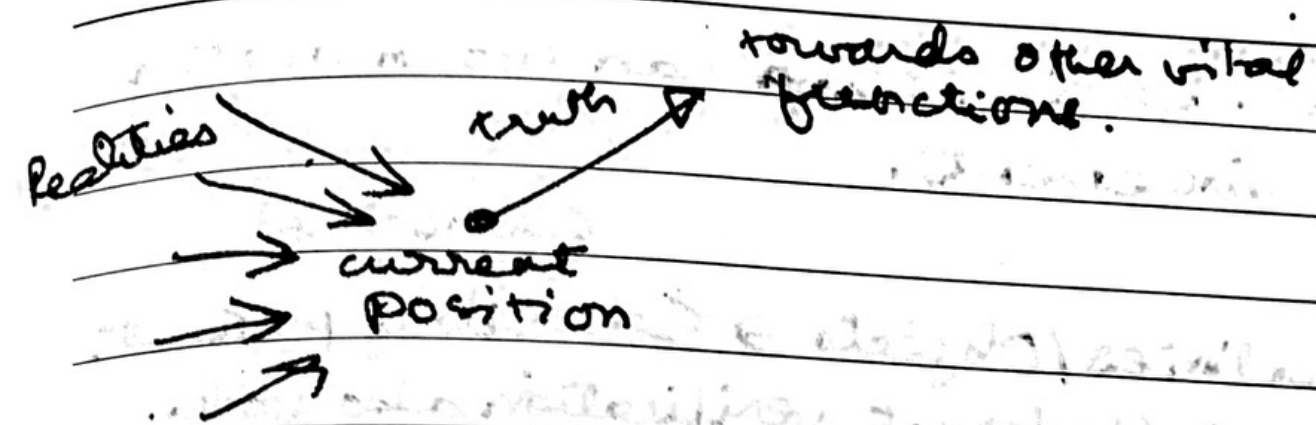

Its verity is a process $\rightarrow$ validation.
What is validation?

$\downarrow$
vague process $\rightarrow$ very powerful.

★

"The possession of true thoughts means
the possession of invaluable instruments
of action."

* Realities can be infinitely useful/harmful
which one to pick is a pragmatic
process. (a primary human duty).

Practical importance of their objects to us.
 At a particular time. → Any object may potentially become valuable therefore other ideas, objects are collected and organized in order of central or peripheral.

Extra truth → relevant → do work in the world

We become more activated to its truth.
 true → starts the verification
 useful → end of the process.

leads to work while experience to have been lead to (new experience).
 one moment

one experience ~~can~~ can warn another in increments.

(sensory)

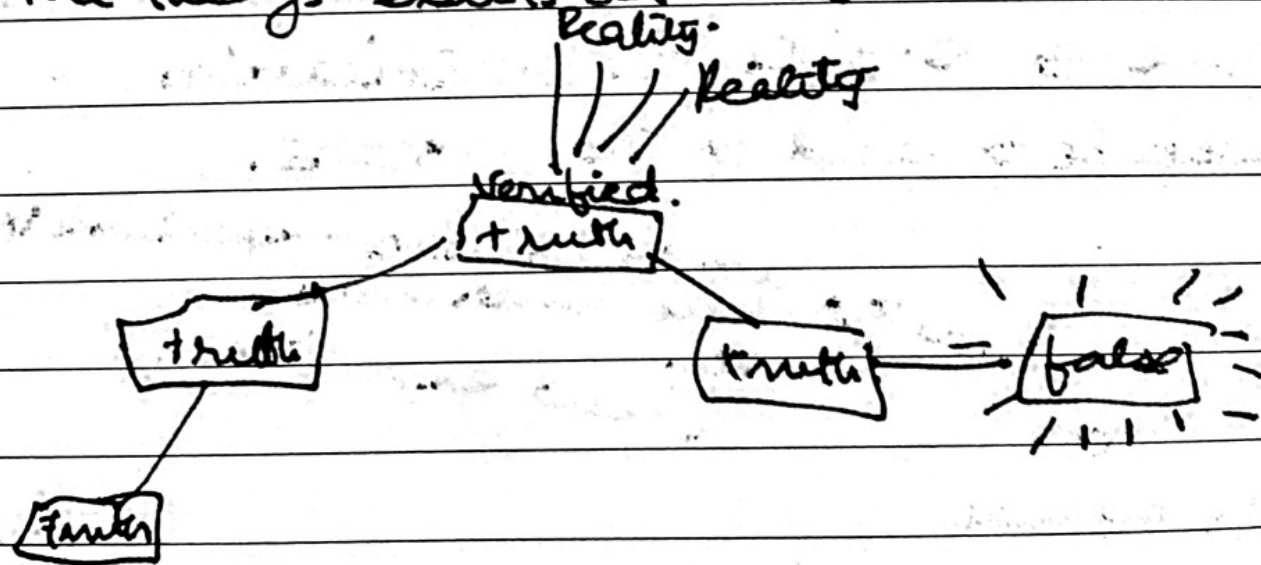

- 1) Realities/Objects → Sensibly present.
- 2) Direct/Indirect verification also works.

unverified truth.
 (assume the clock works).

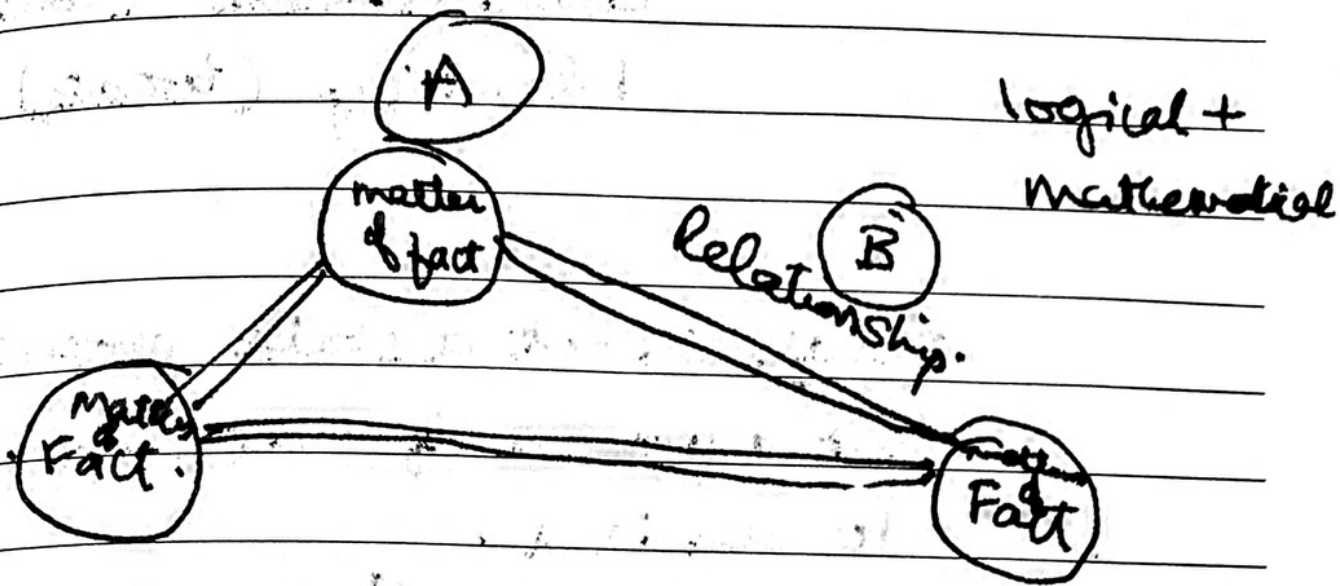

- Truth lives on a credit system.
- Pass as long as no challenge.
- ⊗ - Truth collapses like the trading system. (financial)

All things exist in kinds.

It remains true as long as it runs ~~through~~ through the system without obstruction.

All things exist in kinds (not singly).

(becomes eternal)
True → 'Definition of Principles'

↓
Transferable. (kind)
(Sense verification skipped).

Fact + Theory.

* Ready made ideal frameworks

* Bring back the senses →

Ideas must agree with realities.

Agree = copy.

ideas can only be symbols
minds can't copy 'power'

reality

- To copy an idea is not the essential part of the idea.
* the essential thing is the process of being guided.
it will hold true

concrete facts.

perceived

Relationships.

Truth → validate (check/prove)
Assimilate (likeness)
Corroborate (confirm)
Identify (locate)

Truth is not a static property
but a process of that happens
to an idea.

or 'UPDATING TRUTH!'
(Idea) Create 'MORE TRUE' works.
incrementally make the works 'more'
true.

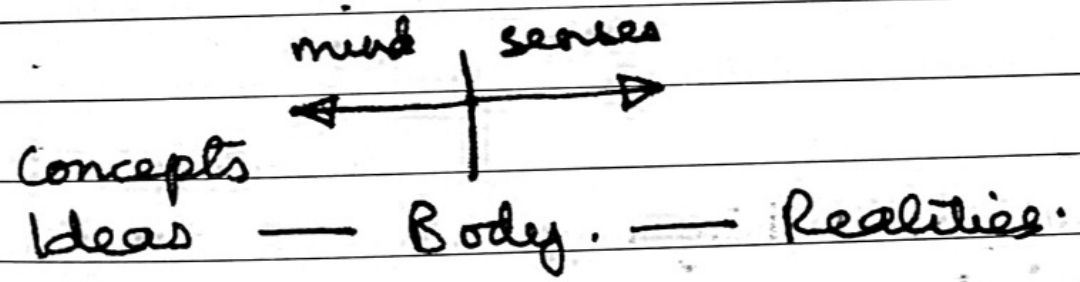

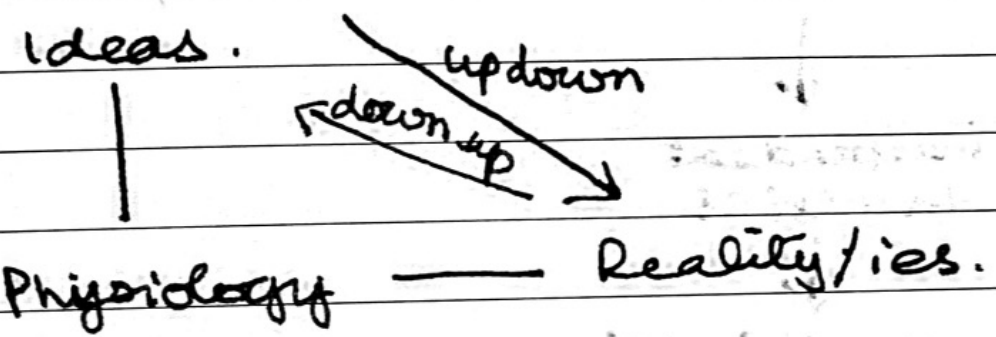

TRUTH → action
starts with verification ends with usefulness.
direct indirect. only lasts as long
as the 'truth' runs
unobstructed.

All things exist in kinds. → Transferable
qualities.

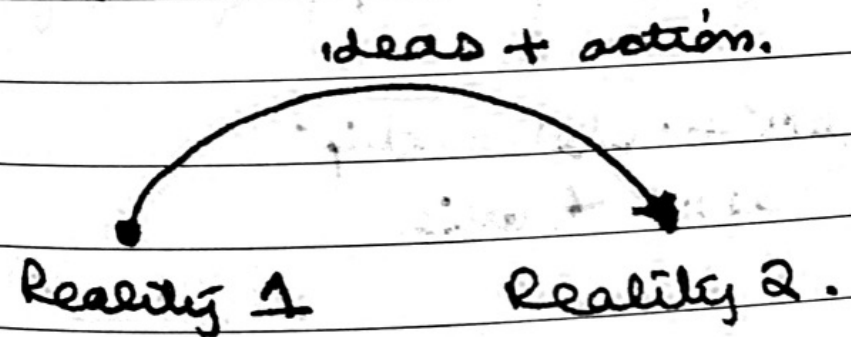

thoughts on Mind/Body conflict.

~~Spirit~~ ~~Mind~~ X ~~Body~~

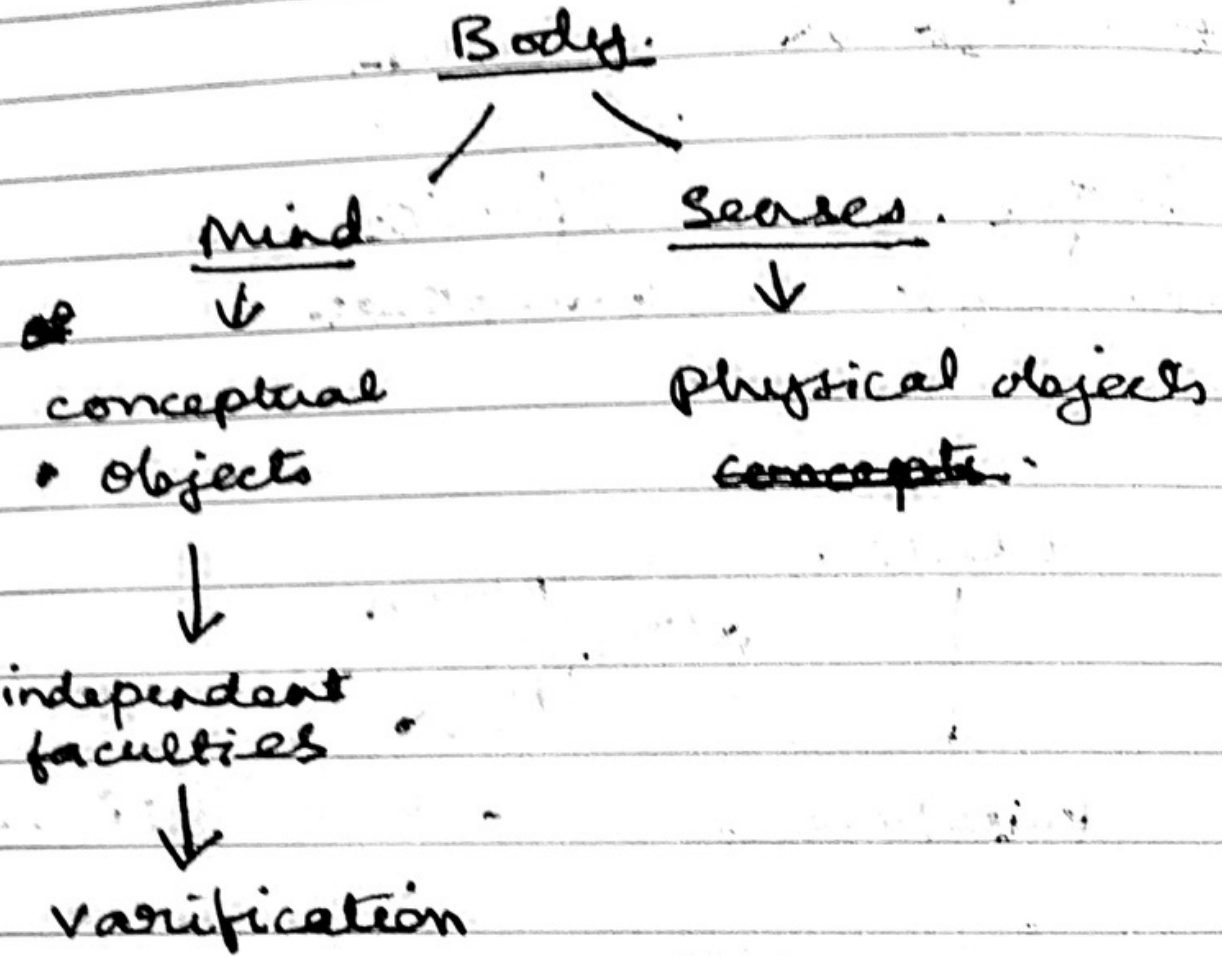

Body (sensual) / Spirit conceptual

(*) the body negotiates between Realities and ideas.

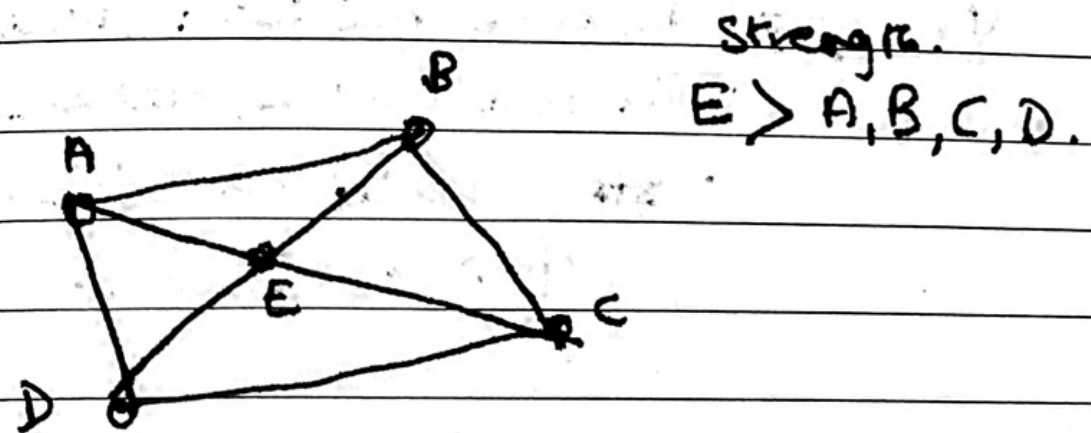

manas chitta Buddhi Akanksha.
Doubt X Memory X Logic X Ego (Identity)

Everything is a thing.
an object. → we grasp it physically or mentally.
mentally graspable / physically graspable.

Every obj → fact + relationship
math + logic

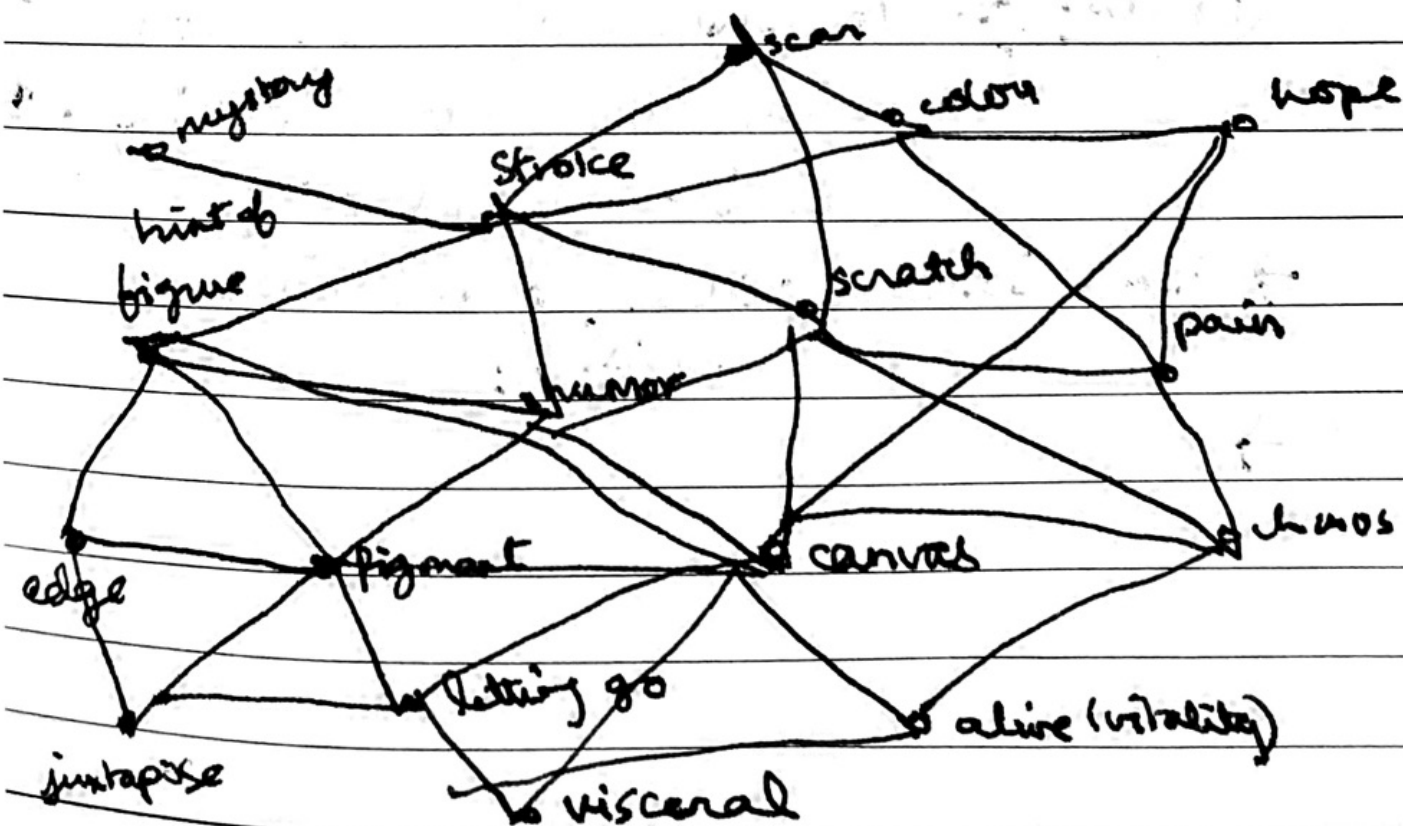

But every thing is also a kind, (relationship).
 Which means things can be abstracted
 (Like a network).

💡 Truth seems to be a network phenomena.

Painting. No relationship between the
 two pigment and its relationship

Objects in my paintings $\Rightarrow$ stroke, scratch,
 painting, pigment, colors, (texture)
 their relationship with each other is

1) the idea of materials $\Rightarrow$ oils inherent ideas.

$\Rightarrow$ oils resist
 $\Rightarrow$ oils create skin etc.

Value $\Rightarrow$ Reduce friction (idea $\rightarrow$ art)
 $\Rightarrow$ involve more senses
 $\Rightarrow$ creates active participation
 from viewer.

2) the materials of idea $\Rightarrow$

- materials can be organised to
- express an idea. Ideas can also be
- illustrated through materials.
- Ideas can never be materials
- Ideas can only experienced through materials
- Materials can never exist without ideas. (things are also kinds).
- materials can hold ideas

Value $\Rightarrow$ Acknowledge the fact that
 things are not just things. (anti-reductionist)

$\Rightarrow$ Experience new ideas $\rightarrow$ feel vital
new realities.

$\rightarrow$

ideas ← BODY → realities

for me
The Body is both ^(essence) spirit and matter.

Body as spirit

Body as matter

matter as spirit

spirit as matter

PAINTING = SUBJECT + OBJECT.

↓

Painting = Essence/Idea + Material
= Idea of material.
material of Idea.

Idea X material.

the idea of materials → oils (inherent ideas in oil)
the materials of ideas →

(X) Idea as Idea. (not productive 4 me)

Absolutists →

- 1) can never derive ^{true} value from it
- 2) Very little involvement of the senses
(Especially when I feel that we are feeling beings that think)

3)

My stand → is to reject indulging in
idea as idea → anti-conceptual →
anti realist approach.

✓ Material as Material.

I'm very excited to revisit the physicality
of the materials that I use.

My stand → move away from
painting as image → painting as
object.

Implications of Painting as body.

- 1) A painting An encounter (with a painting) is like an encounter with a person.
- 2) The painting has body and spirit
- 3) I'm interested in 3 of their 4 relationships.

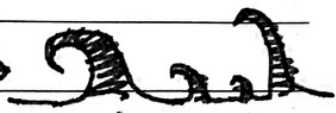

• body as body	• I'm not that interested
• body as spirit	• in spirit as spirit.
• body spirit as body.	• as it can not be put to any use. (?)
- 4) Each relationship has its +ve's and -ve's. As a pragmatist, each of these relationships have different 'cash' value depending on circumstance.
- 5) Given ^{my and} our particular circumstance, I've created a body of artworks.

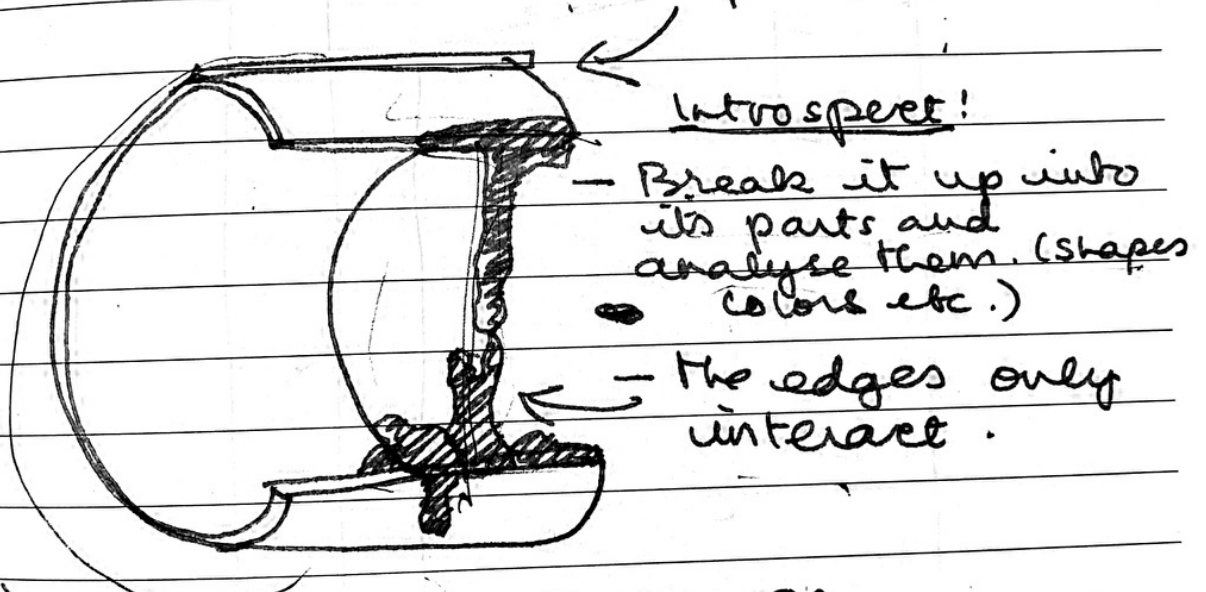

Painting as Body. (ideas 4 experiments)

- * 1) Mirror.
- * 2) See itself.
- * 3) clothing / hair
- * 4) Naked
- 5) Cold / warm.
- * 6) Healthy body / Sick body
- * 7) Young body / Old body.
- 8) Augmented body. / Cyborg body.
- * 9) Extended senses (using tech)
- * 10) Wounded body / Rotting body.
- * 11) Post-Mortem
- * 12) Dead / Alive
- 13) Glowing / Vital
- 14) Body eaters → maggots
- 15) Body language.
- 16) Body double / Doppelganger
- * 17) Muscle memory
- 18) Firm body / loose body.
- 19) Named / Un-named
- 20) Free / Restricted -
- * 21) Suicide (what's suicide to a painting?)
- * 22) What is sex for a painting
- * 23) What is sexual fitness for a painting?
- 24) What does a body remember / witness?
- 25) How does a painting heal?
- * 26) Abused painting
- 27) Tattoo.

Experiment ideas.

- 1) Mirror:
- every object is mirrored. → every stroke is countered.
 - half a canvas → reflecting
 - A work that works both ways.
- (*) → - make a monoprint out of a painting.

- paint → 
- 2) See itself
- spikes that turn in on themselves
 - two works opposite each other.
 - two works C-shaped canvas.

- 3) Spirit escaping the canvas.
