Raghava 2020

Reimagining History

Raghava KK
2011 - 2015

In the history series I explore construction of disparate narratives and clashes between these constructions as they come together in "the real world."

This evokes feelings of alienation, juxtaposition and original significance to create parallels between cartoons and the flattened schizophrenic subjectivities in these paintings. My characters are layered memes and archetypes from art history and popular culture.

Raghava KK

2020

Raghava KK has pioneered a groundbreaking body of diverse works that explore transcendence through the lens of the current digital era. Featured on CNN's list of ten fascinating thinkers, authors and provocateurs in 2010, Raghava's work traverses traditional forms of painting, installation and performance, while his practice embraces new media (artificial intelligence, neuro-feedback, biohacking, board and video games, crypto currencies etc), to express post-human contemporary realities.

His lectures, including 5 TED talks, are known for inspiring audiences to expand their social and psychological selves, using art. Netflix, this year launched an episode on Raghava in the Creative Indians Series.

Raghava's storytelling migrates among his various disciplines through 50 foot live paintings, interactive books sponsored by Apple (Pop-it, won a Kirkus book award that year), Album designs for Erykah Badu and Paul Simon, as creator in residence at Viacom, NY, Raghava launched Must# at both TED and Viacom HQ, A Visual Empathy Algorithm that learned how the viewer made meaning visually and pushed him to transcend the limits of his taste.

Raghava has mentored several creative entrepreneurs by infusing his philosophy into their processes and products. In 2010, Raghava co-founded and chaired The INK Fellowship (The TED of India), India's leading global multidisciplinary fellowship program. Raghava was inducted into the National Geographic Society in 2013 as an Explorer, for pushing the boundaries of scientific exploration through art. In 2015, He created a new compositional process, part human and part algorithm-driven through his collaborative project SOZO - a painting machine, developed for him by Artmatr at the MIT Media lab.

In 2017, Raghava was invited by Jeff Bezos to conduct an art workshop for leading creative minds from around the world. The same year, as a partner, he helped set up the vision and strategy for Roundglass, India's largest venture fund for wellbeing.

In 2018, Raghava co-founded 64/1, an art collective dedicated to blurring the lines between art, art criticism and art education.

In 2020, Raghava created Eye Candy - a performance art piece on Instagram (with Under25 studios) in an attempt to reach out to a completely different audience, than the usual audience for high art, through a completely different art form that combines monologue, painting and self-help.

Currently, Raghava is the co-founder of Canvas, an ambitious open sourced, virtual platform for creators. He currently lives and works out of Bangalore, India.
