A STAR IS BORN

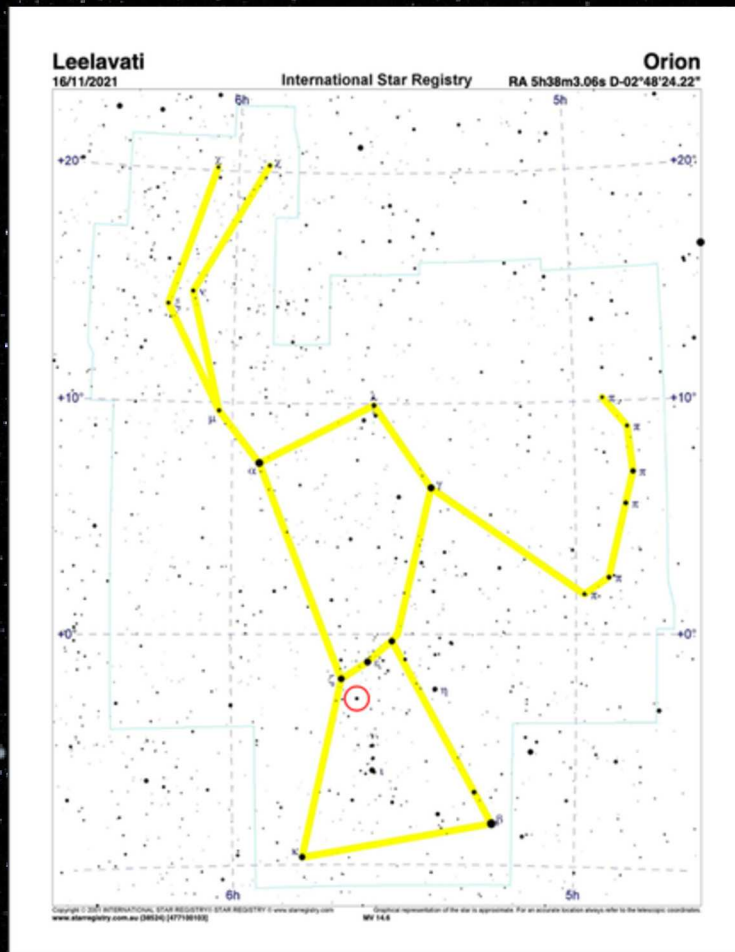

Leela loved the heavens. The first constellation she knew was Orion.

The star in the celestial hemisphere she most identified herself with was Mintaka, in Orion.

We have named a star in Orion after her. Here is how to find it/her:

Star name: Leelavathi

POEM

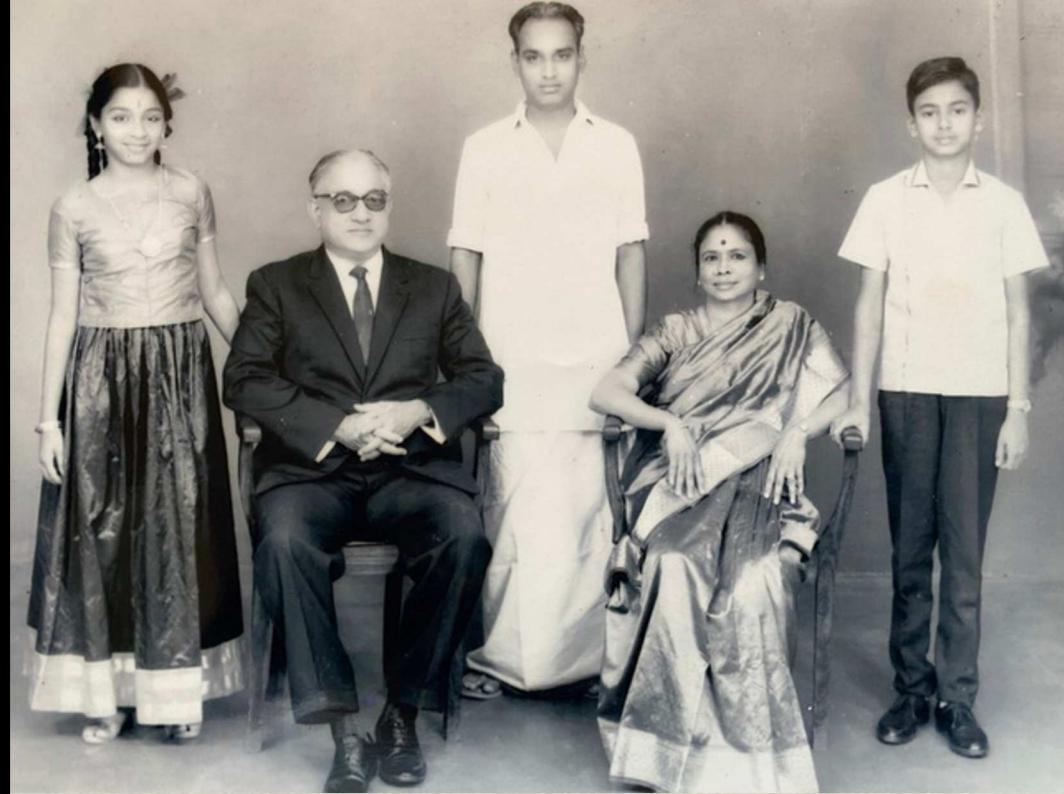

Leela had a special relationship with English Romantic Poetry and particularly with Keats. We have chosen the following modified excerpts from Shelley's elegy for Keats also because it resonates with her final beliefs about existence

SEPTEMBER 5, 2016
ARCADIA FOOTBALL FIELD

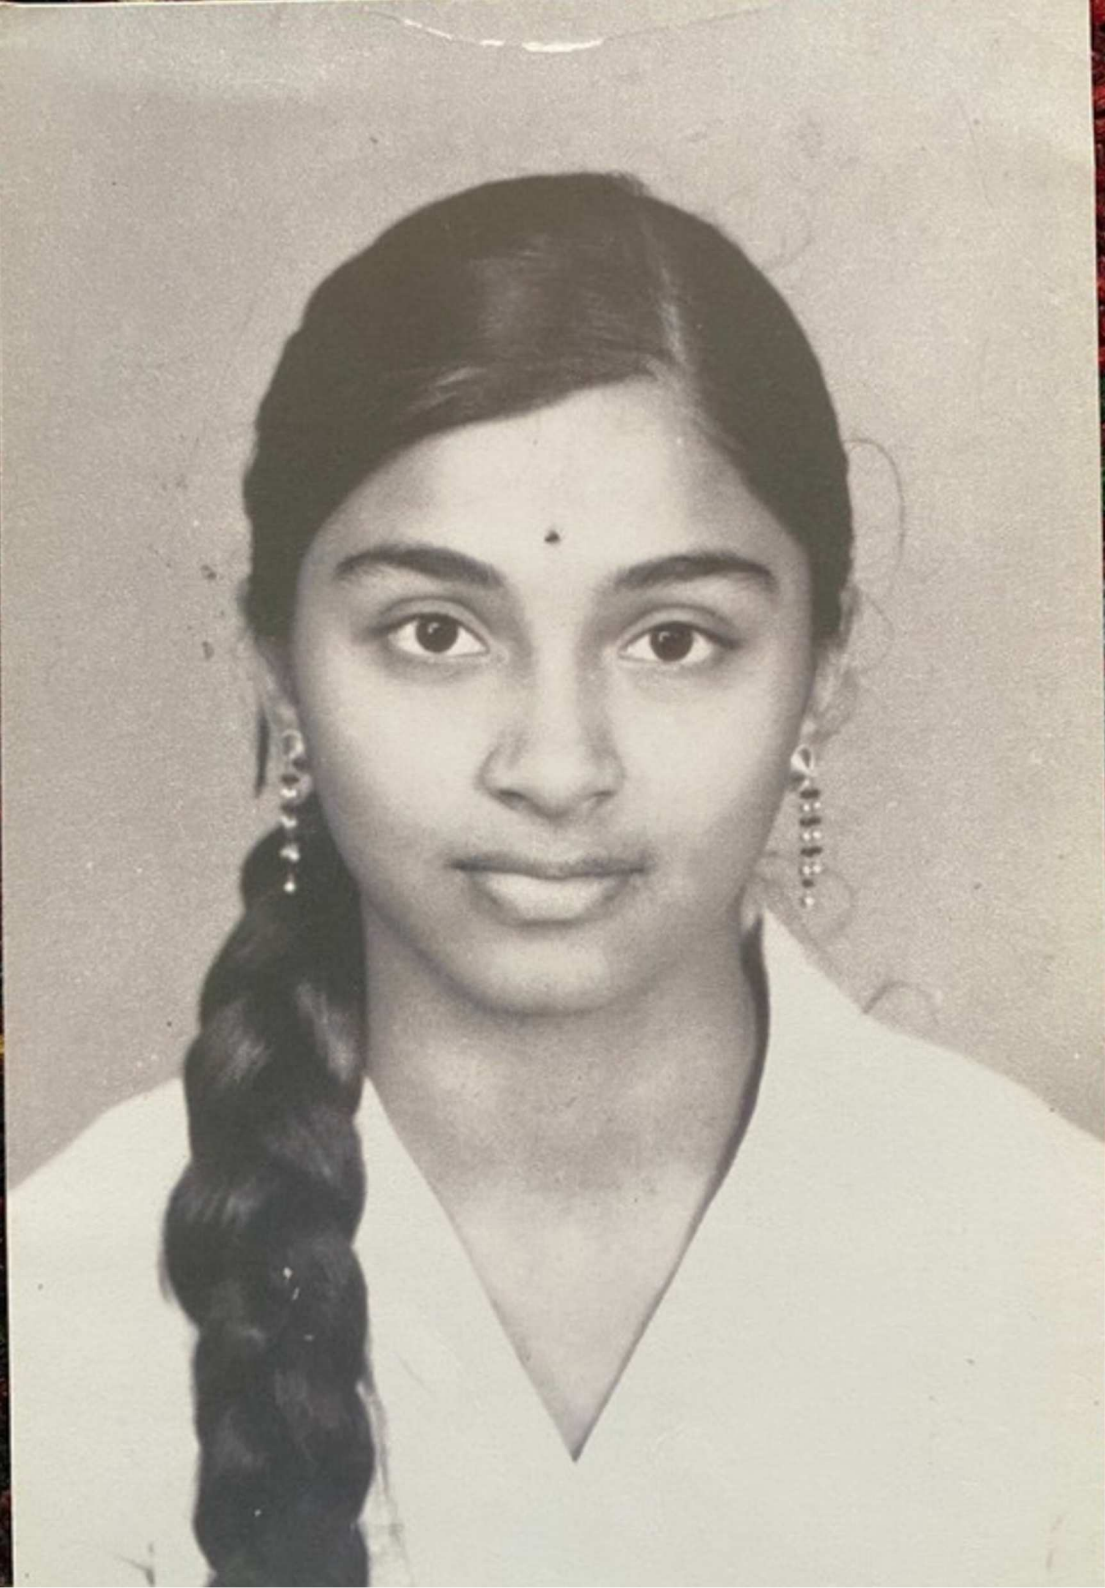

*She is made one with Nature: there is heard
Her voice in all its music, from the moan
Of thunder, to the song of night's sweet bird;
She is a presence to be felt and known
In darkness and in light, from herb and stone,
Spreading itself where'er that Power may move
Which has withdrawn her being to its own;
Which wields the world with never-wearied love,
Sustains it from beneath, and kindles it above.*

*That Light whose smile kindles the Universe,
That Beauty in which all things work and move,
That Benediction which the eclipsing Curse
Of birth can quench not, that sustaining Love
Which through the web of being blindly wove
By man and beast and earth and air and sea,
Burns bright or dim, as each are mirrors of
The fire for which all thirst; now beams on her,
Consuming the last clouds of cold mortality.*
